OBJECTIVE

Seeking an intership or co-op that will allow me to take full advantage of my passion and experience in Software Engineering.

EDUCATION

- **Iowa State University** — Ames, IA
  Bachelor of Science, Computer Engineering — *Expected graduation: May 2018*

HONOR

Iowa State Deans List, Spring 2017.

PROJECTS

- **qchackers** — https://github.com/vtomole/qchackers
  Hacking Quantum Computers — *September 2017 - Present*
  - **Virtual machine**: Implemented a virtual machine in Python that executes Quantum algorithms.
  - **Hack Harvard**: Won the Hacker Prize (Sharing information openly; doing something for its own sake; finding creative solutions to problems.) at Hack Harvard.

- **C48** — https://github.com/vtomole/c48
  A Modern Scalable Programming Language — *September 2017 - Present*
  - **Parser**: Implemented an s-expression parser.
  - **Intepreter**: Implemented an evaluator that executes basic programs.

- **Evie** — https://github.com/vtomole/evie
  A Programming Language Playground — *September 2016 - Present*
  - **Cantor**: Wrote a programming language inspired by Set Theory that won a prize for "Most interesting project" in a Fall 2016 Hackathon.
  - **Shell**: Implemented a Shell intepreter that is capable of executing Linux shell commands.
  - **Kiana**: Implemented a virtual machine that interprets an assembly language.

- **Victorys AI Playground** — https://github.com/vtomole/victorysaiplayground
  Documenting my education in Machine Learning — *May 2016 - August 2016*
  - **AIPlayground**: Programmed basic neural networks in Jupyter Notebook and trained neural networks on a GPU.
  - **Blog**: Implemented in Django and deployed using Heroku: https://victorysaiplayground.herokuapp.com/

PROGRAMMING SKILLS

Skilled: Quantum Computing, C, Common Lisp, Scheme
Experienced: Java, Python
Basic competency: Javascript

EXPERIENCE

- **Iowa State Academic Success Center** — Ames, IA
  Tutor — *September 2017 - Present*
  - **Tasks**: Help students understand material that is taught in the "Theoretical Foundations in Computer Engineering" and "Single Variable Calculus" classes.

WRITING

Architecture for a trapped ion quantum computer   https://vtomole.github.io/static/microwave-arch.pdf
